

AARYESH NAMDEO

Computer Science & Engineering Student | MERN Stack | Machine Learning
7248979986 • aaryesh364@gmail.com • [LinkedIn](#) • [GitHub](#) • Indore, Madhya Pradesh

CAREER OBJECTIVE

A self-driven Computer Science student with hands-on experience building full-stack web applications using the MERN stack and real-time collaboration systems. Actively exploring Machine Learning and data-driven software. Seeking a remote or part-time internship in web development or ML where I can contribute meaningfully while continuing my B.Tech.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya — Indore, Madhya Pradesh

B.Tech — Computer Science & Engineering | 3rd Year | Expected 2027 | CGPA: 7.8 / 10.0

Viva College of Arts, Commerce and Science — Mumbai, Maharashtra

Class XII (Science) | 2022 | 56.6%

St. Mary High School — Mumbai, Maharashtra

Class X | 2020 | 84.6%

TECHNICAL SKILLS

Languages: C++, Python

Web Development (MERN): React.js, Vite, Node.js, Express.js, MongoDB, Supabase, Tailwind CSS, Zustand, Framer Motion

Python & ML Libraries: NumPy, Pandas, Scikit-learn

Databases: MySQL, MongoDB, SQLite, Supabase (PostgreSQL)

Tools & Platforms: Git, GitHub, VS Code, Postman, Flask, Linux

Core CS Concepts: Data Structures & Algorithms (DSA), DBMS, OOP, Operating Systems, Computer Networks

PROJECTS

VaultNotes — Full Stack Realtime Collaboration Platform

React · Vite · Supabase · Zustand · Tailwind CSS · Framer Motion · TipTap Editor

Live: <https://vaultnotes-seven.vercel.app> | GitHub: <https://github.com/iamaaryesh-n/vaultnotes>

- Built a realtime collaboration platform with encrypted public/private Vaults, personal diaries, live chat, and social interactions.
- Implemented realtime messaging, optimistic UI updates, role-based workspace access, and secure Vault architecture using Supabase Realtime and encryption workflows.
- Optimized frontend performance by reducing redundant API calls, improving rendering flow, and stabilizing realtime sync across feeds and chats.
- Designed rich text editing, shared posts, reactions, comments, and public Vault discovery features.

FocusForge — Productivity Chrome Extension

JavaScript · Chrome Extension APIs · DOM Monitoring

GitHub: <https://github.com/iamaaryesh-n/focusforge>

- Developed a Chrome extension that filters distracting YouTube content based on user-defined focus intent.
- Optimized real-time detection for videos, playlists, and Shorts using efficient DOM monitoring and lightweight filtering logic.

Smart Campus Timetable Management System

Python · Flask · SQLite · pdfplumber · HTML / CSS / JavaScript

GitHub: <https://github.com/iamaaryesh-n/SmartCampus>

- Built a full-stack timetable management system to automate timetable handling for students and faculty.

- Implemented PDF timetable parsing and regex-based extraction to convert unstructured PDFs into structured database records.
- Developed REST APIs using Flask with SQLite for timetable storage and retrieval, paired with a responsive frontend interface.

CERTIFICATIONS

- HackerRank SQL — Basic, Intermediate & Advanced (all three levels verified)

RELEVANT COURSEWORK

- Data Structures & Algorithms (DSA) • Database Management Systems (DBMS) • Object-Oriented Programming (OOP)
- Operating Systems • Computer Networks • Software Engineering • Introduction to Machine Learning • Web Technologies

LANGUAGES

- English — Professional proficiency
- Hindi — Native
